

Star Research

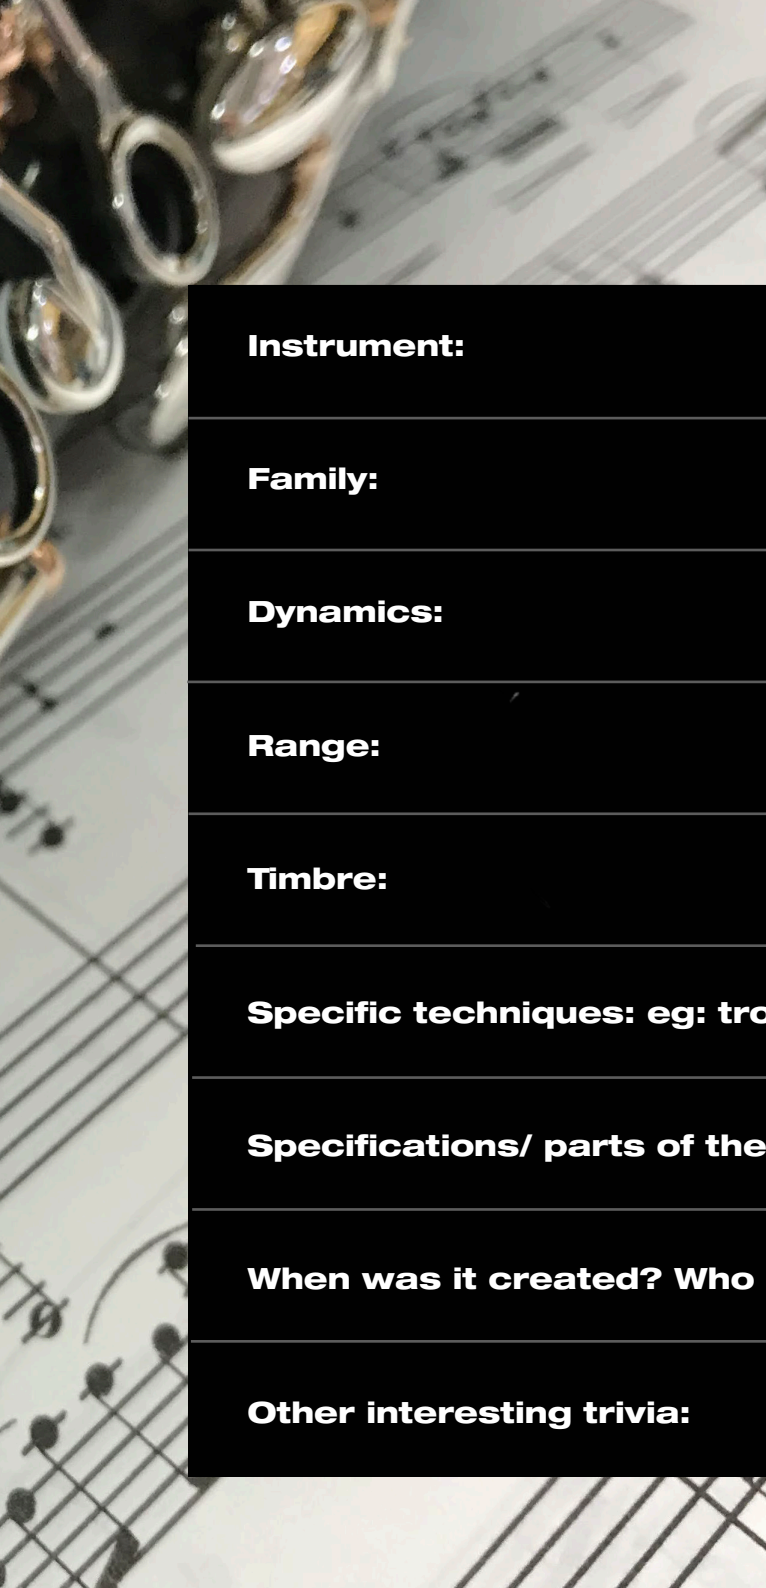

Before you start building your quiz, make sure to do lots of research on your chosen instrument. You want to make sure you have a good understanding so that you can create interesting and challenging questions for the player.

Write down the 5 most interesting facts about your instrument on each point of the star.

To help you get started on your research, head to the MusicEDU Website/Main Event you can find Instrument Asset Kits. The videos, sound files and extra information found here will help you with getting started with this project.

Use the following table as a guide to finding the information you need for your research:

Table 3.11 - Instrument Research:
